

TRR 274

**Checkpoints of
Central Nervous System
Recovery**

TRR274 Lecture Series

Winter semester 2022/23, 5 - 6.30pm, online via Zoom

“Checkpoints of Central Nervous System recovery”

18.10.2022	Veit Rothhammer <i>University Hospital Erlangen, Erlangen</i>	Interaction of glial cells during autoimmune CNS inflammation
25.10.2022	Leanne Godinho <i>Institute of Neuronal Cell Biology, TUM, Munich</i>	Examining brain plasticity following vision loss
08.11.2021	Lara Marten <i>University Medical Center Göttingen, Göttingen</i>	Demyelination and repair in pediatric leukodystrophies
22.11.2022	Francesca Odoardi <i>Institute for Neuroimmunology and Multiple Sclerosis Research, UMG, Göttingen</i>	CNS entry and exit routes
06.12.2022	Hannelore Ehrenreich <i>Max Planck Institute for Multidisciplinary Sciences, Göttingen</i>	Effects of erythropoietin on neuroplasticity, neuroprotection, anti-inflammation and neuroregeneration
10.01.2023	Thomas Korn <i>Experimental Neuroimmunology, Klinikum rechts der Isar, TUM, Munich</i>	T cells in the initiation and modulation of autoimmune tissue damage in the CNS
24.01.2023	Stefan Jakobs <i>University Medical Center Göttingen, Göttingen</i>	Super-resolution light microscopy
07.02.2023	Jovica Ninkovic <i>Biomedical Center, LMU Munich & Helmholtz Zentrum München</i>	Evolution of the CNS Regeneration
